

Questions for IFB #251-26-140 – Supplemental Math Curriculum & IEP Goal Support

Reference	Vendor Question	Answers
Page 3: Minimum Qualifications	Would the district consider a teacher-facilitated instructional tool that includes pre-developed learning materials to administer to students on demand?	Yes.
Page 3: Preferred Supplemental Curricula	Is the district prioritizing adaptive learning technology that personalizes instruction for students, or is it primarily seeking digital content that teachers can implement and guide during instruction?	We would like a combination of both. Some of the students utilizing the resource may not have a class that supports Math work. We therefore prefer the option of resources that can be used at home as well as on that can be used in class if the student has a class listed in their scheduled.
