

2000-2001 End-of-Course Multiple-Choice and English II Testing Results

August, 2001

Authors: Chuck Dulaney and Glenda Burch

End-of-Course (EOC) test scores in the Wake County Public School System (WCPSS) in 2000-2001 showed generally positive results when compared to 1999-2000 data. WCPSS students showed gains in seven subject areas and no change in three subject areas on the multiple-choice tests. No multiple-choice test showed a decline in average score. On the English II writing test, 63.0% of WCPSS students showed proficiency in writing in 2001, up 4.9 percentage points from 58.1% proficient in 2000.

Background

North Carolina began implementing End-of-Course (EOC) tests in the 1985-86 school year with the first administration of the Algebra I test. Other high school subject tests were added over time until the program included ten multiple-choice tests (Algebra I, Algebra II, Geometry, English, U.S. History, Economic/Legal/Political Systems [ELP], Biology, Chemistry, Physical Science, and Physics) and one writing test (English II). The 11 EOC tests are aligned with the Standard Course of Study in each of the areas tested.

The multiple-choice tests are scored using a standardized scale. Scale scores are grouped into four levels of proficiency with Levels 3 and 4 indicating sufficient mastery for success in a higher level course. The English II writing test is scored by two independent trained readers who use a 6-point focused holistic scoring method. Students who score 3 or above are considered to be proficient.

In 1995-96, under the ABCs plan, EOC testing was required statewide for all students enrolled in Algebra I, English I, Biology, ELP, U.S. History, and English II, with testing in the remaining courses optional for local school districts. These six courses are graduation requirements, and tests in these courses were revised to place a stronger emphasis on higher-order thinking skills. Beginning in 1998-99, all students statewide enrolled in five elective courses (Geometry, Algebra II, Chemistry, Physics, and Physical Science) were also required to take EOC tests.

The multiple-choice tests must be given during the last two weeks of the course. The writing test is administered during the second semester of English II.

WCPSS Multiple-Choice Test Results

When compared to the prior year, the average scale scores for WCPSS students on Algebra I, Algebra II, Geometry, U.S. History, Biology, Chemistry, and Physical Science increased, with increases ranging from 0.2 to 2.0 scale score points. Algebra I and Algebra II increased by more than one point while other EOC tests averaged less than a one-point gain. See Figure 1 and Figure 2 for mean scale scores for the ten multiple-choice EOC tests in WCPSS for the past three years.

Figure 1: EOC Mean Scale Scores For WCPSS From 1999 To 2001

Course	1998-1999	1999-2000	2000-2001
Algebra I	61.4	63.4	64.7
Algebra II	65.3	65.0	67.0
Geometry	62.5	63.0	63.7
English I	56.7	58.0	58.0
Economic/Legal/Political Systems	56.5	57.6	57.6
U.S. History	59.5	58.3	59.2
Biology	58.3	59.0	59.2
Chemistry	61.8	61.3	62.0
Physics	59.7	59.1	59.1
Physical Science	54.9	55.4	56.2

Figure 2: EOC Multiple-Choice Mean Scale Scores for WCPSS From 1999 To 2001

Achievement Level Scores

The achievement level score categorizes student achievement according to four broad levels, defined by the North Carolina Department of Public Instruction (NCDPI) as follows:

Level I: Students performing at this level do not have sufficient mastery of knowledge and skills of the course to be successful at a more advanced level in the content area.

Level III: Students performing at this level consistently demonstrate mastery of the course subject matter and skills and are well prepared for a more advanced level in the content area.

Level II: Students performing at this level demonstrate inconsistent mastery of knowledge and skills of the course, and are minimally prepared to be successful at a more advanced level in the content area.

Level IV: Students performing at this level consistently perform in a superior manner clearly beyond that required to be proficient in the course subject matter and skills and are very well prepared for a more advanced level in the content area.

Both multiple-choice tests and the English II writing test have level scores. Scale score ranges for levels for each multiple-choice EOC test can be found in *Understanding End-of-Course Testing: Achievement Levels*, Assessment Brief Volume 5 No. 5. Holistic score ranges for levels for each multiple-choice EOC test can be found in *North Carolina End-of-Course Test of English II*, Assessment Brief Volume 6 No. 7. Both Assessment Briefs are published by the North Carolina Division of Accountability Services in the Department of Public Instruction and are available at the DPI website at www.ncpublicschools.org.

As shown in Figure 3, the percentage of students scoring at Levels III and IV on EOC tests reached new three-year highs in seven of the eleven tested courses in 2000-2001. Only in Economic/Legal/Political Systems did the percentage of students scoring in the proficient range decline from the previous year.

Figure 3: Percentage of Students Scoring At Level III or IV On WCPSS EOC Tests From 1999-2001

Course	1998-1999	1999-2000	2000-2001
Algebra I	78.3	81.5	88.0
Algebra II	77.3	75.6	82.4
Geometry	74.0	74.8	80.0
English I	74.2	78.6	79.1
English II	69.1	58.1	63.0
Economic/Legal/Political Systems	73.6	78.4	78.1
U.S. History	66.7	60.2	64.0
Biology	68.4	70.4	70.6
Chemistry	77.7	74.6	78.0
Physics	81.9	79.3	81.8
Physical Science	59.1	62.5	66.1

Results By Race and Gender

Disaggregated data by race and gender for all ten multiple-choice tests for the past two years are shown in Figures 4 and 5. Figures 6-10 show disaggregated data by race for the five End-of-Course tests required by the state for the last three years.

As shown in Figures 4 and 5, females tend to score higher than males on the EOC test in English I, while males tend to score higher on EOC tests in ELP, U.S. History, Geometry, Algebra II, Chemistry, Physics, and Physical Science. Algebra I and Biology scores show little difference by gender. Average scores for white students are substantially higher than average scores for black students on all ten tests.

Figures 6-10 show the percentage of students by race who scored at Level III or IV on the five EOC courses required for graduation. The following patterns can be seen:

- Gaps between white and black students remain relatively constant over time, with a slight decrease in the size of the gap in Algebra I, English I, and ELP in the last three years.
- Black students showed higher percentages on all five tests from 1999-2000 to 2000-2001.
- Algebra I percentages show a steady pattern of improvement over three years.
- After a rise for all groups in ELP and English I percentages in 1999-2000, scores rose for two groups and dropped for two groups in 2000-2001.
- Biology percentages rose for all four groups in 1999-2000, and rose for three groups in 2000-2001.
- U.S. History percentages rose for three groups in 2000-2001.
- The percentage of Hispanic and Asian students students at Level 3 or 4 dropped in 2001 in U.S. History, English I, and ELP.

WCPSS English II Test Results

The percentage of English II scores of 3.0 or higher (Level 3 or Level 4) for WCPSS students rose to 63.0% in 2000-2001. This is higher than the 58.1% in 1999-2000, but is lower than the 69.1% achieved in 1999. Only 4.9% of student scored in Level 1, down from 9.0% in 2000.

The percentage of WCPSS high school students showing proficiency in 2000-2001 ranged from 77.6% at Green Hope to 12.7% at Phillips. Eleven of the 16 high schools had higher percentages in Level 3 or 4 than they had the previous year. Refer to Figure 11 for percentages by school for the past four years.
