WCPSS ADVANCED PLACEMENT (AP) TEST RESULTS 2005-06 SCHOOL YEAR

Brad McMillen

College-level coursework is offered to high school students through the Advanced Placement (AP) program. Many colleges and universities provide course credit to students who earn a high score on the end-of-year exams, which are offered by the College Board. All comprehensive high schools in the Wake County Public School System (WCPSS) offer AP courses, although the availability of specific courses varies from school to school. Many students take more than one AP course, and not all students enrolled in AP courses take an AP exam in the subject. The cost to take each AP exam in 2005-06 was \$82.

AP Exam grades determine whether a student is qualified to receive college credit or advanced placement into a higher level course in college. The scores are reported on a 5-point scale as follows:

- 5 Extremely well qualified
- 4 Well qualified
- 3 Qualified
- 2 Possibly qualified
- 1 No recommendation

Analysis of 2005-06 AP reports from the College Board reveals the following:

1. The number and proportion of WCPSS students taking AP courses and exams continues to grow. Since 1996-97, the number of students enrolled in WCPSS grew by 42%. During that same time, however, the number of WCPSS students taking AP exams increased by 145% and the number of AP exams taken increased 158%.
2. As more and more students in WCPSS are taking AP exams the average exam score has dipped slightly (3.42 in 1996-97 to 3.30 in 2005-06), as has the percent of exams with scores of 3 or higher (from 80.4% in 1996-97 to 74.7% in 2005-06). This pattern is consistent with both state and national trends over that same time span.
3. WCPSS AP exam scores (both average score and percent of scores 3 or higher) have surpassed the corresponding state and the national figures each year since 1996-97. Comparison data for the U.S. for 2005-06, however, are not yet available.
4. The five AP exams taken most frequently in WCPSS in 2005-06 were English Language and Composition (1,034), Environmental Science (939), U.S. History (794), Statistics (583), and Calculus BC (555).

5. In looking at the most commonly taken AP exams in WCPSS in 2005-06, the percent of exams on which students scored 3 or higher ranged from a high of 90.5% in Calculus BC to a low of 59.0% in Calculus AB. In most subjects, over 70% percent of scores were 3 or higher.
